

REPLY TO OFFICE ACTION  
DATED MARCH 18, 2008

Appln. No. 10/541,170

- 2 -

June 12, 2008

Amendment to the Specification

(1) Please amend the specification on page 8, staring at line 14, as follows:

Figure 3 shows a sectional view of the sealing strip in a plane III-III in Figure 1; and

Figure 4 shows a portion of Figure 2 on an enlarged scale.

(2) Please amend the specification on page 9, lines 15-23, as follows:

The inner shaped part 2 is constructed as a flat web which extends parallel to the inner wall 3' and is held thereon, for example by screwing 32, as indicated at the location 10 and shown in Figure 4. On its end remote from the edge portion 6 it bears a sealing element 11 on which a sealing lip 12 is formed which extends into the space 4. The lip 12' which can also be seen in the drawing and protrudes into the interior of the vehicle serves principally for decorative purposes.

(3) Please amend the specification on page 11, lines 9-13, as follows:

For example, as shown in Figure 4, for implementation by design of a possibility for adjustment of the shaped part 1 the hole in the base part 13 intended to receive the fixing screw 20 can be an elongate slot 30, the cross-section of which extends in the direction of the arrows 21.
